## “Alternative Grid in Modern Quilting”

Alternate grid work is a modern quilting design element that is used frequently by modern quilters. It is often one of the easiest design elements to experiment and explore modern quilt making with. Modern quilters often “break the grid”. Alternate grid work is a tool to help showcase modern quilting design fundamentals such as negative space, no borders, minimalism, asymmetry, modern traditionalism and exaggerated scale.

Kathy with Tula Pink  
At Quilt Con!

Kathy is a prolific quilt who loves to explore modern quilting including improv, taking traditional quilts and Making them modern. She will share her knowledge on Alternative Grid work and show her beautiful quilts!
